

TRISSAAN ANANDHANAYAKI SHANMUGASUNDARAM

Melbourne, AU | <https://www.linkedin.com/in/trissaan>

0434549364 | trissaan@gmail.com

Data Scientist | Data Analyst | ML & Cloud Engineer with a strong foundation in **Python, SQL, BI Tools**, and **AWS**. Skilled in both independent problem-solving and team collaboration. Experienced in developing machine learning models, integrating APIs, and optimizing data pipelines for scalable solutions. Previous roles include **Project Engineer at Wipro** and **Data Analyst at Packcentre**, transitioning from part-time to full-time after completing a **Master of Data Science at Deakin University**. With studies now completed, looking to leverage ML and cloud expertise to drive data-driven solutions at scale, tackle new challenges, and drive impactful insights.

SKILLS

- **Languages & Tools:** Python, R, SQL, Git, DAX, PowerShell
- **ML & AI:** Scikit-learn, TensorFlow, PyTorch, Feature Engineering, Model Deployment (Docker, AWS Lambda)
- **Cloud & Data Engineering:** AWS, ETL Pipelines, SQL DBs, Tidyverse
- **Data Analytics & BI:** Power BI, Tableau, Excel, Data Integration, KPI Dashboards

PROFESSIONAL ACHIEVEMENTS

- Achieved **AWS Certified Data Engineer – Associate** (May 2025) while balancing full-time work and postgraduate studies.
- Transitioned from part-time to full-time Data Analyst within **2 months** based on performance.
- Delivered **\$40,000** in cost savings by streamlining **Power BI + Salesforce** data validation workflows.
- Led **cloud-based data solution** design discussions with end clients at Wipro.

EXPERIENCE

DATA ANALYST (POWER BI | SQL | ETL PIPELINES)

Packcentre | Melbourne, AU

APRIL 2024 - PRESENT

- **Designed and maintained Power-BI dashboards** for the logistics manager, enabling real-time stock monitoring and immediate action on inventory levels.
- **Partnered with management, sales, and marketing teams** to identify analytical needs, deliver tailored insights, and automate reporting processes, reducing manual effort and refined efficiency.
- **Integrated and validated data from sources, including Power-BI and Salesforce**, improving accuracy and minimizing data loss, resulting in a **\$40,000 (3%) reduction in financial losses**.
- **Enhanced decision-making by tracking key performance indicators (KPIs) and trends**, providing data-driven support for strategic planning.

PROJECT ENGINEER (AWS | PYTHON AUTOMATION)

Wipro | Tamil Nadu, IN

MAY 2022 - FEBRUARY 2023

- **Developed ETL pipelines using AWS Glue and Python libraries**, optimizing data ingestion and transformation workflows.
- **Automated asset management tasks with Python scripts**, reducing manual effort and cutting staff time spent on the process by **23%**.
- **Led requirements gathering with end clients** to design and implement **cloud-based solutions**, boosted system efficiency and scalability.

EDUCATION

MASTER OF SCIENCE IN DATA SCIENCE

Deakin University

FEBRUARY 2023 – NOVEMBER 2024

- **Graduated with a distinction average**, demonstrating consistent academic excellence.
- **Achieved a High Distinction** in Data Wrangling by transforming messy data into actionable insights.
- **Engineered a deep learning model for Speech Emotion Recognition**, analyzing and classifying emotional tones in speech as part of a group project.

BACHELOR OF ENGINEERING IN ELECTRONICS AND COMMUNICATION

Dr. Mahalingam College of Engineering and Technology

JUNE 2018 – APRIL 2022

- **Graduated with First Class Honors**, showcasing a strong academic foundation in data-driven technologies.
- **Gained hands-on experience with embedded systems, digital signal processing, and machine learning applications** through coursework.
- **Conceptualized and built an Autonomous Warehouse Robot**, integrating robotics and IoT to optimize warehouse operations and streamline logistics.

KEY PROJECTS

Autonomous Warehouse Robot (Bachelors Project)

- **Modelled and constructed** an autonomous warehouse robot capable of navigating environments and delivering items.
- **Implemented real-time data processing and innovative decision-making**, enhancing adaptability and outperforming similar projects.
- **Identified potential improvements**, such as advanced sensor integration, to further optimize performance.

Speech Emotion Recognition (Masters Project)

- **Constructed a deep learning model** for speech emotion detection, analysing and classifying emotional tones with high accuracy.
- **Enhanced recognition accuracy** by incorporating **prosody analysis** and leveraging deep neural network architectures, outperforming peer models.
- **Gained key insights from peer feedback**, identifying dataset expansion as a way to improve model generalization across diverse emotional contexts.
